DETAILED ACTION

Reissue Applications

1. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
2. Applicant's amendment and remarks submitted April 4, 2001, have been entered in the case. However, the claim amendments are not in the proper format used in reissue applications. Reissue applications do not use the "new" amendment format used in regular utility applications. Reissue applications continue to require that all changes made to the application that are not present in the original patent must be underlined in the case of additions or placed in brackets in the case of deletions. Therefore, the entire claim must be underlined in claims that are added in the reissue. In this amendment applicant has not used the reissue amendment format. An amendment filed using the proper format must be submitted.
3. While the examiner does not necessarily agree with applicant's position that the examiner's earlier line of reasoning with respect to recapture would preclude any sort of broadening reissue, applicant's remarks with regard to the new claims' pertinence to the previous prior art rejection and that these added overlooked limitations provide a material narrowing of the claims are agreed with. Therefore, the earlier rejection of claims 51-94 based on the recapture doctrine is withdrawn.

Conclusion

4. This application is in condition for allowance except for the following formal matters:
as noted above, applicant must surrender the original patent and an amendment in the proper reissue format must be submitted.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
